NOTES

ABOUT THIS PUBLICATION

The Monthly Summary of Statistics, Australia contains, at the time of printing, the latest available data on a wide range of topics. It provides a comprehensive overview of the economic and social conditions in Australia.

In the contents pages, tables of series containing seasonally adjusted indicators are marked with a dagger (†).

As well as being adjusted for normal seasonal factors, some of the statistical series included in the *Monthly Summary of Statistics, Australia* have been adjusted for the effects of calendar variation: namely, trading-day effects (arising from the varying numbers of Sundays, Mondays, Tuesdays, etc. in a month) and the influence of movable holidays, for example, Easter and Australia Day.

Trend estimates are shown for some series in which the seasonally adjusted series have been smoothed to reduce the impact of the irregular component.

SYMBOLS AND OTHER USAGES

The following is an explanation of the symbols used in this publication:

n.a. not available

n.e.c. not elsewhere classified

n.e.s. not elsewhere stated

n.p. not available for publication unless otherwise indicated but included in totals where applicable

n.y.a. not yet available

p preliminary figure or series may be subject to revision

r figures or series revised since previous issue

* subject to sampling variability too high for most practical purposes.

. not applicable

nil or rounded to zero

break in continuity of series (where drawn across a column between two consecutive figures)

Yearly periods shown as, for example, 1995, refer to the year ended 31 December 1995, those shown as, for example, 1994–95, refer to the year ended 30 June 1995.

Values are shown in Australian dollars (\$).

Where figures have been rounded, discrepancies may occur between sums of the component items and totals. Also, minor revisions to figures already published are not applied for periods more than one quarter prior to the quarter of publication. Hence, small discrepancies may occur between annual data and totals derived by summing the data for each of the four quarters.

Most of the original and all of the seasonally adjusted series are subject to revision.

FOR MORE INFORMATION

The ABS has a far wider range of information on Australia than that contained in this publication. Information is available in the form of regular publications, electronic data services, special tables and from investigations of published and unpublished data.

Current publications produced by the ABS are listed in the Catalogue of Publications and Products (1101.0). The ABS also issues, on Tuesdays and Fridays, a Release Advice (1105.0) which lists products to be released in the next few days. The Catalogue and Release Advice are available from any ABS office.

RELEASE SCHEDULE

Please note that there has been a break in the series of this publication. Delays in the production of the Monthly Summary of Statistics, Australia means that issues for March, April and May 1996 have not been released.

The following timetable shows the details for 1996 releases of this publication:

Issue	Release Schedule
January	released 13 March 1996
February	released 29 April 1996
March	not issued
April	not issued
May	not issued
June	released 31 July 1996
July	released 16 August 1996
August	released 30 August 1996
September	released 30 September 1996
October	expected to be released 31 October
November	expected to be released 29 November
December	expected to be released 23 December

¹ The estimates relate to all persons aged 15 and over except members of the permanent defence forces, certain diplomatic personnel of overseas governments, overseas residents in Australia and members of non-Australian defence forces in Australia. For definitions see Explanatory Notes in the latest issue of the monthly publication Labour Force, Australia (6203.0).

² Original labour force estimates are now based on population estimates obtained form the 1991 Census of Population and Housing.

³ The number of unemployed in each group as a percentage of the labour force in the same group.

⁴ The labour force in each group as a percentage of the civilian population aged 15 and over in the same group.

¹ For more information regarding seasonal adjustment see Explanatory Notes in the latest issue of the monthly publication Labour Force, Australia (6203.0)

Original labour force estimates are now based on population estimates obtained from the 1991 Census of Population and Housing. Seasonally adjusted and trend estimates have also been revised following the annual reanalysis of seasonal factors.

For more information regarding trend estimates see Explanatory Notes in the latest issue of the monthly publication Labour Force, Australia (6203.0).

³ See Explanatory Notes in Labour Force, Australia (6203.0) paragraph 30.

Original labour force estimates are now based on population estimates obtained from the 1991 Census of Population and Housing. Seasonally adjusted and trend estimates have also been revised following the annual reanalysis of seasonal factors.

 $^{^{1}\,}$ See Explanatory Notes in the latest issue of Consumer Price Index (6401.0).

From March quarter 1994 the statistics for New Zealand refer to all groups excluding housing and credit services.

The statistics for Germany refer to Western Germany — Federal Republic of Germany before the unification of Germany. Revised in January 1991 due to new weighting pattern and methodological changes.

Includes natural gas.

² Total electricity generated by establis' ments predominantly engaged in the generation of electricity.

This series replaces the previously published 'Iron and Steel in Primary Forms' and 'Blooms and Slabs from building and forging'. Changes in industry practices mean that almost all raw steel is now used to produce Blooms and Slabs using continuous casting methods.

⁴ For structural purposes.

⁵ Source: Australian Bureau of Agricultural And Resource Economics. Quarterly figures are expressed in terms of green off sawn volumes.

 $^{^{1}\,}$ Excludes extra light beer containing less than 1.15% but more than 0.5% by volume of alcohol.

Double and triple superphosphate expressed in terms of single superphosphate, that is, 9% P equivalent.

Source. Australian Tobacco Marketing Advisory Committee.

⁴ Excludes conversions of existing vehicles.

Includes utilities, prime movers for semi-trailers and units consisting of chassis, engines and cabs produced for sale and transfer out as such. Excludes off-highway trucks (for example, dump wagons), materials handling trucks (for example, forklift trucks) and semi-trailers.

 $^{^{1}}$ Includes mixtures predominantly of the fibres named. Excludes sewing thread, elastic or elastomenc.

² Amounts of taxable wool received by brokers and dealers from wool producers.

³ Includes scoured and carbonised wool used in further processing — for example, for production of tops. Also includes degreased, whether or not bleached or dyed in the mass.

Excludes scoured wool used for carbonising in the same establishment.

Australian Standard Commodity Classification (ASCC) item codes 651.35,36.

⁶ ASCC item codes 651.01 — 651.14.

Excludes guaze and elastic fabrics.

⁸ Excludes elastic fabrics and tyre cord.

⁹ ASCC tem codes 652.16,17,70,80.

 $^{^{10}}$ ASCC tem codes 54.23, 24, 25, 26, 36, 37, 38, 39.

 $^{^{11}}$ ASCC item codes 653.21, 22, 35, 36, 37, 38, 39, 40, 50, 71, 72, 73, 74, 75, 76, 92.

Comprises holdings of Foreign Exchange, Special Drawing Rights, Reserve position in IMF and Gold. Figures are end period \$A values, except for the "US\$ equivalent" series, and, those referring to 'movement due to' and 'RBA transactions'. June figures for the latter in the top half of the table refer to totals for financial years.

Source: Reserve Bank of Australia.

² Reported according to the date on which they were undertaken ('trade date').

³ Reserve Assets and Exchange Rates in the Balance of Gold is valued at the \$A equivalent of the 3 p.m. price fix in the London gold market on the last business day of the month. See also table 62, Official Payments section.

. The figures in this table are derived from returns submitted to the RBA by banks authorised under the Banking Act 1959 together with similar returns voluntanly submitted by the State banks.

2 Other include balances (other than deposits) to overseas banks not authorised in Australia and issues of term subordinated debt, loan capital and similar instruments.

3 A Resident is a person ordinarily residing in Australia, or an exterprise or body operating in Australia. Australian subsidianes of foreign enterprises and branches of foreign enterprises are regarded as residents, while foreign branches and subsidianes of Australian enterprises are regarded as non-resident.

Includes: all provision accounts other than those relating to bad and doubtful debts; accounts payable and prepayments received; gold bullion borrowings which are repayable in physical gold; credit balances resulting from the netting of all deferred tax liabilities and tax benefit accounts; cheques drawn by a bank on its self but not yet presented; and all other Australian dollar liabilities on banks. Australian books other than retained earnings and shareholders' funds, accrued interest not yet payable and inter-branch loans.

Includes bearer bonds and notes denominated in foreign currency which are issued offshore but recorded on banks' Australian books.

¹ The Statutory Reserve Deposit ratio for trading banks was set at zero on 2? September 1988 and balances transferred to non-callable accounts. On 12 October 1988, stand-alone savings banks made their first deposits under arrangements for all banks to hold non-callable deposits with the Reserve Bank.
³ Break in series due to establishment of new bank(s), which may have caused the switching of assets and liabilities from NBFIs to banks.

Includes government owned vehicles except those belonging to the defence services. Excludes plant and equipment, caravans and trailers. Data from December 1990 in this table is based on the System of Vehicle Identification Numbers (VIN) introduced by motor vehicles authorities from July 1990 onwards. The system allows more accurate identification and classification of newly registered vehicles and as a result there is a reduction in the level of new vehicle registrations through better identification of duplicate registrations and those registered previously.
